

Apparity Announces New Product Features and Enhancements – Spring 2016 Release

ATLANTA, Georgia, March 31, 2016 - Apparity, LLC, the global leader in spreadsheet governance and controls has announced their new product features and enhancements for the spring 2016 release. These new features and enhancements will continue to improve Apparity's ability to solve the most critical industry challenge with spreadsheets, "has the integrity of the spreadsheet been compromised, and how will this impact the business?".

New Product Features

Integrity Management

Provides an Apparity user with advance warning of any unauthorized changes to an Apparity Managed Spreadsheet.

Audit Tool

Delivers a comprehensive audit analysis of every aspect of any spreadsheet, whether that spreadsheet is managed by Apparity or not.

Inventory Management

Allows users to manage an organizations inventory of Apparity managed spreadsheets, while aligning align subjective and technical file details in an attempt to identify the criticality of the spreadsheet.

Major Product Enhancements

Fingerprinting Methodology

Delivers a full scale approach to managing and tracking critical level spreadsheets across the enterprise, allowing the solution to achieve the level of controls necessary to managing business critical spreadsheets.

Intelligent File Disconnect

Allows users to disconnect Apparity managed file as either an Excel or CSV file format, while still maintaining an audit trail of the managed spreadsheet.

Exception Reporting

Allows companies to identify and report upon critical level spreadsheets that have been modified but not yet subjected to a Review and Approval cycle.

Business Intelligence Integration

Enables companies to associate file specific organizational and business process level information, and report against those elements across the enterprise.

Cell Level Restricted Access

Provides cell level access restrictions to specific users providing an additional layer of protection over a single cell or a range of cells or worksheet.

About Apparity, LLC.

Apparity, LLC provides Enterprise Content Management (ECM) software and support for spreadsheets to companies within highly regulated industries. The Apparity patent pending technology securely monitors and assists with all material events that occur in the lifecycle of a mission critical spreadsheet, without interfering with content or existing Excel® operations.
