

## **Springleaf OneMain, a leading consumer finance company selects Apparity to provide Enterprise wide Sarbanes controls for mission critical spreadsheets.**

**June 27, 2016, Atlanta Georgia** - Apparity, LLC the global leader in End User Computing (EUC) controls announced today that it has entered into a contract with the consumer finance company, Springleaf One Main, part of the OneMain Holdings group of companies, to provide an integrated spreadsheet governance and controls solution.

The deployment of the Apparity platform across all Springleaf and OneMain accounting and finance offices will provide the inventory, security, version and change management controls required to ensure regulatory compliance.

A critical component of the Apparity solution will be the implementation of the Lookback Service. The Apparity Lookback Service is designed to ensure that all significant changes made to SOX related spreadsheets since the last baselined version are identified. Once the identified changes have been reviewed and approved, the spreadsheet is then 'on-boarded' into the Apparity system.

Because the Apparity system does not interfere with the way a user works with their spreadsheet the business cycles that are reliant on the output of the spreadsheet remains unaffected. In addition, because Apparity is always tracking user access and spreadsheet content change then the process for approving significant changes and compliance reporting is streamlined and accurate.

### **About Apparity, LLC**

Apparity, LLC provides Enterprise Content Management (ECM) software and support for spreadsheets to companies within highly regulated industries. The Apparity technology securely monitors and assists with all material events that occur in the lifecycle of a mission critical spreadsheet, without interfering with content or existing Excel® operations.
