

Nu Skin Enterprises selects Apparity to provide End User Computing controls, governance and workflow to manage their key regulatory taxation and financial reporting cycles.

December 5th 2016 Atlanta Georgia, Apparity, LLC the proven global leader in End User Computing solutions announced today that it has entered into a contract to provide the multibillion direct selling company, that operates in over 50 markets worldwide, with a spreadsheet access, version and change management workflow solution.

The deployment of the Apparity solution across the US based corporate taxation and financial reporting functions will provide managers and end-users the ability to securely monitor, track and record all significant change events required to ensure regulatory compliance.

A critical component of the Apparity solution will be the implementation of the 'built for purpose' Review and Approval workflow system. Typically companies have to rely on the 'honor' system to ensure all the important changes made to spreadsheets are identified and reviewed in a timely and accurate manner. The Apparity Change Log solution tightly integrates an efficient workflow solution into the industry leading change management process.

Running in a production environment that can be accessed from any office anywhere in the world Nu Skin can now track and monitor all key spreadsheet access and change across both the international and domestic taxation schedules as well as monitor and report on their financial monthly, quarterly and annual close cycles.

About Apparity, LLC

Apparity, LLC provides Enterprise Content Management (ECM) software solutions for End User Computing to companies within highly regulated industries. The Apparity technology securely monitors and assists with all material events that occur in the lifecycle of a mission critical End User Application, regardless of application type, without interfering with content or existing Excel® operations.
